AUDION

“Audion today continues to adhere to a basic philosophy of making affordable esoteric high-end equipment available to everyone and not a select few with deep pockets.” Absolute Sound

Audion was founded a simple, singular concept. To allow people to get an insight into high end audio without sacrificing their home or bank balance. Two decades on, this philosophy still holds true today. Their aim is to deliver music as close to the originally recorded sounds as can possibly be achieved. They are able to do this through extensive research of various circuit topologies, together with specially selected components from around the world. This puts them at the forefront of valve audio reproduction, delivering world class products that we think you will enjoy.

Here at audio counsel we are pleased to announce we only one of a select few Audion dealers in the UK. We stock the Sterling EL 34 Anniversary, Silvernight 300B Anniversary, & Black Shadow 845 Mono Amplifiers.

AUDION STERLING EL34 ANNIVERSARY

“They’ve got to be one of the best, if not the best buy around.” – Chris Beeching, Hi-Fi News

“Its talents lie in 1. the ability to drive a wide range of loudspeakers and 2. the beautification of music” Digital Audio Review

“This review might be ending but I suspect my own journey with Audion is just beginning. As compelling an argument for ‘quality watts’ as you’ll likely find at any price point, the Audion EL34 Sterling Anniversary amplifier kicks goal after goal. Do not let the specifications sheet deceive you – this is one mighty and beautiful sounding unit.” Digital Audio Review

“Audion today continues to adhere to a basic philosophy of making affordable esoteric high-end equipment available to everyone and not a select few with deep pockets.” Absolute Sound

“The Audion Sterling EL34 Anniversary Edition is a warm and dimensional-sounding amplifier with a potent lower midrange that does justice to the power range of an orchestra. It sang right out of the box and never misbehaved. Kudos to the Audion team for breathing new life into the venerable EL34 pentode. In my estimation, the Sterling EL34 represents a gift to music lovers everywhere. Highly recommended.” Absolute Sound

AUDION SILVERNIGHT 300B ANNIVERSARY

“The Silver Night reproduces subtleties with a degree of finesse that eludes most amplifiers at this price” – Hi-Fi Choice

“The most remarkable thing about the Silver Nights is the truth of timbre, or tonal accuracy [...] a rightness of sound – a freedom from anything that sounds mechanical, contrived or artificial.” - Stereophile Magazine

“The Silver Night really shine the mid range & treble. Coupled with the truth of timbre, there’s remarkable clarity- a hear through quality that you just have to experience” - Stereophile Magazine

“They also have more life: not only do they let more air in, but they also let more sunlight in – there’s more happening between & around the notes, even with digital. While listening to’s system – everything was damped and dead. When I went home and listened to the Silver Nights there were light & life that went beyond delicacy, detail & transparency. These are truly extraordinary amplifiers.” - Stereophile Magazine

“They’ve got to be one of the best, if not the best buy around.” – Chris Beeching, Hi-Fi News

AUDION BLACK SHADOW 845

“An audiophile dream come true ... the 845’s will take any system up, but a highly transparent and resolving system can be taken to levels of musicality that are like opening a screen door on a beautiful Spring day to let the light spread into the room.”

“These amplifiers are significantly responsible for bringing a natural sense of tonal harmonic portrayal that will bring you closer to the music than perhaps any other amplifier you may have known.”

“They possess the bottom end shove to move the most stubborn speakers and a rich harmonic palette that brings one not into an excessively syrupy tube land, but with just a touch of needed euphonic tint that gives instruments their true to life tonality.”

“All of this is indeed highly addictive and you will find yourself unable to get up and leave the room. These are the kind of additions to a system that put all but the constantly addicted system changer at a point of finality.”

“I consider this amplifier so exceptional as to consider this type of amplification for my musical hobby, something I simply cannot live without.”

“I recommend this real world amp with my highest recommendation. Buy one now while these are still made, you will never let it go!!!”
